PROFILE

I am a Frontend Developer skilled in ReactJS and Webflow, focused on creating user-friendly websites. I have a strong foundation in JavaScript and responsive design. I enjoy solving problems and building functional interfaces. I'm eager to join a software house to enhance my skills.

WORK EXPERIENCE

- WEB Development** 2025 - PRESENT
Self-Learning & Home-Based Practice
- I have been consistently learning and building web projects from home, using technologies like HTML, CSS, JavaScript, ReactJS, Tailwind CSS, and Bootstrap. I focus on creating responsive and user-friendly interfaces. While I haven't worked with a company yet, I've developed several projects independently to strengthen my skills and practical understanding of frontend development.

PROJECTS

- Frenchie's Restaurant | Multi-page Responsive Website**
[Live Preview](#)
Technologies: HTML, CSS, JavaScript, AOS Animation, Tailwind CSS, Lordicon
- Frenchie's Restaurant** is a fully responsive, multi-page website designed for a modern restaurant brand. The site includes animated sections, a dynamic menu, contact forms, and blog pages, all optimized for desktop and mobile viewing. It demonstrates strong frontend skills, UI/UX design principles, and attention to responsive layout and performance.
- FoodPanda Clone | Online Food Delivery Web Application**
Technologies: HTML, CSS, JavaScript, AOS Animation, Tailwind CSS
- FoodPanda Clone** is a fully responsive, single-page web application inspired by the FoodPanda platform. The website features a modern UI with restaurant listings, food category filters, and a clean ordering layout. It is designed to replicate the core structure of a real food delivery service, showcasing strong frontend skills, component-based development using React, and a mobile-first approach. The clone emphasizes responsive design, smooth user interaction, and layout accuracy.
